NEOPRENE BRIDGE BEARING

Make: "SANDHYAFEX"

Neoprene Bridge Bearing Pads

SANDHYAFLEX is one of the standout **Neoprene Bridge Bearing Pads** Manufacturers in India. Premium quality Neoprene-Polychloroprene is used to manufacture our bridge bearing pads. Neoprene Bridge Bearing Pads are very easy to install in bridge than other bearings available in market as it required less maintenance.

Our wide range of Neoprene Bridge Bearing Pads is extremely appreciated among our clients for their low maintenance, sturdy construction and high efficiency. High class materials are used to fabricate these pads to make it strong and durable. We are also [Strip Seal Expansion Joint and Drainage Spout Manufacturers](#) in India. Offered products by Neoprene Bridge bearing pads manufacturers are widely demanded in the national and international markets for their longer service life and its competitive prices.

Neoprene Bridge Bearing Pads Manufacturers – Product Features

- *Excellent quality*
 - *Super performance*
 - *Durable*
 - *Cost effective*

 - *Energy efficient*
-

Neoprene Bridge Bearing

SANDHYA ENTERPRISES an ISO 9001-2015 certified company takes Pleasure in introducing as leading manufacturer / Authorized supplier of Neoprene Bridge Bearings,

The factory is located at Hyderabad Telangana INDIA. We have the latest plant and machinery for manufacture of these products and dedicated work force of 25 Employees which includes Engineers & Technicians.

Business type of Elastomeric Bridge Bearing Pads: Manufacturer/ Supplier

Areas covered by Elastomeric Bridge Bearing Pads: Across India

SANDHYA CHAUDHARY
MITHILESH CHAUDHARY

Carbon Free Rubber Hose

CARBON FREE RUBBER HOSE

Carbon free rubber hoses are available with or without asbestos cover

APPLICATION

These are specially designed hoses to carry cables that can conduct upto 11KVA and above.

FEATURES

A synthetic carbon free white tube is used inside to provide the strength and resistance against high heat and electricity.

Asbestos cover is provided on the outer side for longer life.

Can handle the working pressure ranging from 7 kg/cm² to 15 kg/cm²

TECHNICAL SPECIFICATION

Nominal bore (in mm)	Tolerance on Nominal bore (in mm)	Number of reinforcement (ply)	Working Pressure (Kg.f/cm ²)	Testing Pressure (Kg.f/cm ²)	Bursting Pressure (Kg.f/cm ²)
12.5	0.75	3	10	20	40

Water Delivery Rubber Hose Pipe

Enterprises AN ISO:9001;2015 Certified Company is manufacture a Supplier of Water Delivery Rubber Hose Pipe Specification:

Size: 3" ID to 16" ID

EWorking Pressure -2.5 to 5kg/cm²

Color: Black

Temperature- 100Deg C

Top: Plain

Lining : Synthetic Rubber High Water Resistance

Reinforcement: High Quality and Heat Resistance Fabric and Tyre C Reinforcement.

Cover: Weather Resistance Synthetic Rubber

REGULAR SIZE:

SANDHYAFLEX-CFRH-80NB-3Inch ID

SANDHYAFLEX-CFRH-100NB-4Inch ID

SANDHYAFLEX-CFRH-125NB-5Inch ID

SANDHYAFLEX-CFRH-400NB-16Inch ID

SAND BLASTING RUBBER

RUBBER HOSE FOR SAND BLASTING

As per IS 5894/90

APPLICATION

These rubber hose for sand and blasting are used to carry the abrasive material such as sand at a very high pressure. The application is in ordinance factories, manufacturing workshops and other heavy engineering realted works. The level of strength os this hose is very high so that it can satisfy the need of the work. Manufactured to provide the top quality to the hose.

TECHNICAL SPECIFICATION

SIZE		TYPE-I			TYPE-II		
MM	INCH	Working Pressure Kgf/cm ²	Proof Pressure Kgf/cm ²	Bursting Pressure Kgf/cm ²	Working Pressure Kgf/cm ²	Proof Pressure Kgf/cm ²	Burs Pres Kgf/cm ²

Road and Rail Tanker Oil Suction and Discharge Rubber Hose

Sandhya Enterprises AN ISO:9001;2015 Certified Company is manufacturer and Supplier of Road and Rail Tanker Oil Suction and Discharge Rubber Hose as per IS:10733 Specification:

Construction:

The tube of fuel dispensing hoses contains uniform seamless lining of top quality rubber that is completely resistant to petroleum products.

Reinforcement : Plies of woven textile which contains rubber on both the sides. It is supported by the helical wire included in fabric plies.

Electrical Bonding : Low resistant electrical bonding wire is incorporated between the reinforced plies to provide electrical continuity along the whole length of the hose.

Cover: a great smooth synthetic compound which is highly resistant to extreme weather, abrasion, petroleum products, wear and tear.

End Connection : The hose is available with or without flanges and with built in nipples.

APPLICATION

The application is in applying the petroleum products from road rail tanker carrying these products. It is mainly used for the loading and unloading of the products such as petrol and diesel.

TECHNICAL SPECIFICATION

SIZE		Working Pressure	Bursting Pressure	Working Pressure	Bursting Pressure	Working Pressure	Bursting Pressure

Oil Suction and Discharge Discharge Rubber Hose

Sandhya Enterprises AN ISO:9001;2015 Certified Company is manufacturer and Supplier of Oil Suction and Discharge Rubber Hose as per IS:8189 Specification:

Construction:

The tube of fuel dispensing hoses contains uniform seamless lining of top quality rubber that is completely resistant to petroleum products.

Reinforcement : Plies of woven textile which contains rubber on both the sides. It is supported by the helical wire included in fabric plies.

Electrical Bonding : Low resistant electrical bonding wire is incorporated between the reinforced plies to provide electrical continuity along the whole length of the hose.

Cover: a great smooth synthetic compound which is highly resistant to extreme weather, abrasion, petroleum products, wear and tear.

End Connection : The hose is available with or without flanges and with built in nipples.

APPLICATION

PIPE LINE DI PIPE GASKET

Sandhya Enterprises AN ISO:9001;2015 Certified Company is manufacture and Supplier of DI Pipe Gasket (EPDM TYTON) as per IS:5382-2003 Specification:

Size:80mm To 2000mm

For Type 2

Hardness- 50 Shore A

Tensile Strength-11.0MPa

Elongation at Break-400%

For Type 5

Hardness- 80 Shore A

Tensile Strength-9.0MPa

Elongation at Break-125%

Cement Feeding Rubber Hose

Enterprises AN ISO:9001;2015 Certified Company is manufacture and Supplier of Cement Feeding Rubber Hose as per IS:5137:990 Specification:

Size: 3" ID to 16" ID

End Fitting: MS Flange as per ASA 150 # ANSI 16.5 Drilled and DIN Specification.

Working Pressure -10 to 15kg/cm²

Color: Black

Vaccum:500 to 700hg

Temperature- 150Deg C

Top: Plain and Corrugated.

Lining : Synthetic Rubber High Ablation Resistance.

Reinforcement: High Quality and Heat Resistance Fabric and Tyre Cord Reinforcement.

Helical Wire: 16 WWG to 8 SWG High Tensile Spring Helical Wire

Cover: Weather Resistance Synthetic Rubber

SANDHYA ENTERPRISES

Elastomeric Bridge Bearing

Sandhya Enterprises AN ISO:9001;2015 Certified Company is manufacture and Supplier of Elastomeric Bridge Bearing as per IRC 83 (Part II) 2015, MORTH and UIC 772 2R Specification:
Thickness:22mm to 144mm max
Width:100mm to 1000mm Max
Length:100mm to 1500mm Max
Hardness:55 to 65 IRHD
Tensile Strength:17.0MPa min
Elongation at Break:400% min
Adhesion Strength:7kn/M
Ash Content:5% max
Polymers : CR
Polymer Percentage:60%
Shear Modulus 0.8MPa to 1.2MPa
Shape Factor for Elastic Modulus:6 to 12

Strip Seal Expansion Joint

Sandhya Enterprises AN ISO:9001;2015 Certified Company is manufacture and Supplier of Strip Seal Expansion Joint as per IRC 83 (Part II) 2015, MORTH and UIC 772 2R Specification: Gap 40mm and 70 and 80mm movement, 65mm and 75mm Edges Beam with 16mm Anchoring Rod. Neoprene Rubber Strip as per IRC 83 (Part II)2015 Specification)

- 1.Edge beam shall be placed in such a manner that the grooves are positioned properly.
- 2.Steel structure and main reinforcement shall be anchored with proper welding.
- 3.Alignment shall be checked for both steel structures, if required by using suitable device.
- 4.Recess shall be filled with high quality of the concrete not less than M 35 grade.
- 5.If any installation brackets were used, shall be removed after the concrete has cured.
- 6.SANDHYAFLEX elastomeric strip seal shall be cut into the required length and inserted between the beams by using proper device and to be ensured that the bulb of the seal is getting into the steel grooves of the both edge beams.
- 7.When the recess concrete has become set, a sturdy ramp shall be placed over the joint to protect the exposed steel structure and the elastomeric seal from the traffic.
- 8.Without carriageway surfacing, expansion joint shall not be exposed to traffic loading.

Compression Seal Expansion Joint

Sandhya Enterprises AN ISO:9001;2015 Certified Company is manufactures and Supplier of Compression Seal Expansion Joint as per IRC 83 (Part II) 2015, MORTH and UIC 772 2R Specification: Gap 40mm and 70 and 80mm movement, 100mm Edges Beam with 16mm Anchoring Rod. Neoprene Rubber Strip as per IRC 83 (Part II) 2015 Specification)

RUBBER EXPANSION BELLOW

Sandhya Enterprises AN ISO:9001;2015 Certified Company is manufacture and Supplier of Rubber Expansion Joint Bellow per customer Specification:

We offer ranges of standard as well as custom manufactured bellows to cater for many applications from heavy industry to food quality. The selection of bellows design, open:close ratios, stroke length, convolution width, split or endless configuration, and materials will depend on your specific application. Where molded bellows are not suitable, a range of hand-built rubber bellows are available including tapered and smooth bore.

Rubber Expansion Joints protect equipments and piping from damage caused by vibration and thermal movements. While not the primary purpose, they are also frequently used to accommodate equipment misalignments. Rubber expansion joints provide superior flexibility, movement absorption, and cycle life, while resisting chemical attack and abrasion.

They are useful over a wide range of temperatures & pressures, making them the preferred expansion joint for most liquid and solid applications, though gases & solids are also frequently conveyed by rubber expansion joints.

Function of rubber expansion joints :

- ◆ Damp oscillation, noise and vibration
- ◆ Compensate motion
- ◆ Compensate expansion caused by differences in temperature
- ◆ Reduce tension
- ◆ Compensate ground and foundation settling
- ◆ Compensate imprecise assembly
- ◆ Serve as assembly and disassembly aids
- ◆ Provide an elastic wall seal for penetration assemblies
- ◆ Compensate pipeline movements

Three features set Industrial Moulders Expansion Joint technology apart :

Screen Vibrating Rubber Beading

Sandhya Enterprises AN ISO:9001;2015 Certified Company is manufacture and Supplier of Screen Vibrating Rubber Beading per customer Specification:

1. Vibrating Screen Rubber Beading for Wire Mesh Regular size: Gap-10mm Dia-35mm
2. Vibrating Screen Rubber Beading for Wire Mesh Regular size: Gap-8mm Dia-31mm,
3. Vibrating Screen Rubber Beading for Wire Mesh Regular size: Gap-7mm Dia-29mm,
4. Vibrating Screen Rubber Beading for Wire Mesh Regular size: Gap-15mm Dia-29mm

Rubber Cord

Sandhya Enterprises AN ISO: 9001;2015 Certified Company is manufacture and Supplier of Rubber Cord as per Customer Requirement.

Size:2mm Dia to 100mm Dia

Hardness:25 to 80 Shore A

NR Rubber Cord

NBR Rubber Cord

Neoprene Rubber Cord

SBR Rubber Cord

EPMD Rubber Cord

Sponge Rubber Cord

RUBBER STRIP

Sandhya Enterprises AN ISO: 9001;2015 Certified Company is manufacture and Supplier of Rubber Strip as per Customer Requirement.

Hardness:25 to 80 Shore A

NR Rubber Strip

NBR Rubber Strip

Neoprene Rubber Strip
